

# Report on Article 173 of the Law on the Energy Transition for Green Growth

# Presentation of Activa Capital's general approach

01

General approach to taking ESG criteria into account in investment and investment policy risk management

02

Means of informing subscribers about the existence of these criteria

03

Adherence to a charter, code, initiative or obtaining a label related to the consideration of ESG criteria

# 1. General approach to taking ESG criteria into account in investment and risk management policy (1/3)

## □ Our charter

Activa Capital is based on its sustainable development charter, which it regularly updates. This charter details the ESG axes that we wish to pursue, in particular :

- optimize the environmental impact,
- promote responsible human resources management,
- ensure exemplary governance and develop responsible and societal commitment.

Our charter is publicly accessible on our website :

<https://www.activacapital.com/images/stories/PDF/2019/Charte-esg-vf.pdf>

Additional information related to our ESG policy is also available on our website.

## □ Risk management

The Chief Financial Officer of Activa Capital is responsible for risk management. The risk mapping covers all operational risks, fund policy and compliance with regulatory ratios.

Once a year, during the Supervisory Board meeting called to review the annual financial statements of the management company, the risk manager presents an overview of the risk mapping and risk management systems, with the necessary adjustments.

Finally, an ESG associate is dedicated full-time to monitoring ESG investment policy criteria and the risks associated with these criteria.

# 1. General approach to taking ESG criteria into account in investment and risk management policy (2/3)

Activa Capital has adopted a set of processes to integrate the consideration of ESG issues throughout the investment cycle, the main measures of which are as follows :

## □ Before investment

### ○ Excluded sectors

In particular, funds with an open investment period are excluded from the investment scope :

- any illegal economic activity,
- the production and trade of tobacco and related products,
- the production and trade of distilled alcoholic beverages and related products,
- the production and trade of weapons and ammunition of all kinds,
- casino activities, online gambling and equivalent businesses,
- any activity allowing illegal access to electronic data networks or downloading of electronic data.

Finally, Activa Capital undertakes to ensure appropriate control of legal, regulatory and ethical issues in the event of investment in an activity related to human cloning for research or therapeutic purposes and/or GMOs.

### ○ Internal analysis

Each company is subject to an ESG analysis carried out by the ESG associate. This analysis is included in the final investment grade.

# 1. General approach to taking ESG criteria into account in investment and risk management policy (3/3)

## □ During the investment

- **Conduct an ESG audit**

A post-investment ESG audit is systematically carried out. This audit provides an in-depth analysis of the main ESG issues and aims to set up an action plan with the key managers of the companies in charge of the identified issues.

- **Monitoring of ESG projects**

The ESG associate meets regularly with key people for this project and ensures that they progress according to the plan. In addition, each year, ESG reporting is sent to the participations to monitor the evolution of several indicators and to assess the measures implemented.

- **Comité de surveillance**

ESG topics are systematically addressed by the Supervisory Committee. By allowing a better sharing of project progress, the consideration of ESG issues in the company's management is reinforced.

## □ The exit

Depending on the profile of the divested company, a Vendor Due Diligence can be carried out in order to assess the progress of ESG issues and highlight them for the purchaser. Failing this, Activa Capital will make available to the purchaser any ESG information deemed useful.

## 2. Means of informing subscribers, affiliates, contributors, recipients or clients about the existence of these criteria

### ❑ UCIs concerned by the consideration of ESG criteria

As at 31 December 2018, Activa Capital's ESG policy applies to companies in the Activa Capital Fund 3 and Activa 3 IB Fund.

In addition, the companies in the Activa Capital Fund 2 fund are the subject of an annual ESG reporting campaign. Reasonable efforts are made to encourage companies in this fund to progress on non-financial criteria where appropriate.

As a reminder, Activa Capital Fund no longer holds any portfolio companies.

Thus, 70% of the assets under management of Activa Capital are subject to the ESG criteria of the management company.

### ❑ Means of information

The management reports of the Activa Capital Fund 2, Activa Capital Fund 3 and Activa 3 IB Fund include a section dedicated to the ESG. As a reminder, the Activa Capital Fund is being dissolved.

In addition, Activa Capital produces an annual global ESG report, available on our website.

### 3. Adherence to a charter, code, initiative or obtaining a label related to the consideration of ESG criteria (1/3)

Activa Capital is convinced that non-financial performance, as well as financial performance, confers greater sustainability to its investments and creates value. Activa Capital is committed to developing it by respecting the commitments it has made by becoming a signatory to principles, manifests, initiatives or charters.

#### PRI

The signing of the PRI in January 2010 marks the continuation of our commitment to measure and encourage responsible actions by the companies in which we invest. Accordingly, we make the following commitments as soon as they are in line with our fiduciary responsibilities :

- We integrate ESG issues into our decision-making and investment analysis processes.
- We are active shareholders and integrate ESG issues into our shareholding policies and procedures.
- We ask, as much as possible, that the entities in which we invest be transparent about ESG issues.
- We encourage the adoption and implementation of the Principles in the investment sector.
- We are working together to improve the effectiveness of our implementation of the Principles.
- We each report on our activities and progress in implementing the 6 Principles.

### 3. Adherence to a charter, code, initiative or obtaining a label related to the consideration of ESG criteria (2/3)

#### ❑ IC20

In 2016, Activa Capital made a commitment to the iC20 (Climate 2020 Initiative) to contribute to the COP21 objective of limiting global warming to two degrees. As a signatory to the iC20, Activa Capital undertakes to :

- Recognize that climate change will have economic impacts that represent risks and opportunities for companies.
- Take into account climate issues over the entire investment period.
- Carry out a progressive measurement of the portfolio's carbon footprint for companies for which this issue is material.
- Define, with the management of these companies, an action plan to reduce emissions and adapt to climate change.

#### ❑ The Shift Project

In 2017, Activa Capital joined the Shift Project, a think tank working towards a carbon-free economy. “An association recognised as a non-profit organisation and guided by the need for scientific rigour, its mission is to enlighten and influence the debate on the energy transition in France and Europe”.

### 3. Adherence to a charter, code, initiative or obtaining a label related to the consideration of ESG criteria (3/3)

#### □ Global Compact

In 2019, Activa Capital became a signatory to the Global Compact dependent on the United Nations. The Global Compact provides a simple, universal and voluntary framework for engagement, based on 10 principles relating to respect for human rights, international labour standards, the environment and the fight against corruption :

- **Principle 1** : Businesses are encouraged to promote and respect the protection of international human rights law.
- **Principle 2** : Companies are urged to ensure that they are not complicit in human rights violations.
- **Principle 3** : Businesses are encouraged to respect freedom of association and to recognize the right to collective bargaining.
- **Principle 4** : Businesses are encouraged to contribute to the elimination of all forms of forced or compulsory labour.
- **Principle 5** : Businesses are encouraged to contribute to the effective abolition of child labour.
- **Principle 6** : Businesses are invited to contribute to the elimination of all discrimination in employment and occupation.
- **Principle 7** : Businesses are encouraged to apply the precautionary approach to environmental issues.
- **Principle 8** : Businesses are encouraged to take initiatives to promote greater environmental responsibility.
- **Principle 9** : Businesses are encouraged to promote the development and diffusion of environmentally friendly technologies.
- **Principle 10** : Businesses are encouraged to take action against corruption in all its forms, including extortion and bribery.

## Background information

Paragraph VI of Article 173 of Law No. 2015-992 of 17 August 2015 on the energy transition for green growth supplements Article L. 533-22-1 of the Monetary and Financial Code with two paragraphs.

Decree No. 2015-1850 of 29 December 2015 specifies the information to be published on how investment policy should take into account criteria relating to compliance with social, environmental and governance quality objectives and on the means implemented to contribute to the energy and ecological transition.
